

HOT WATER SYSTEM SELECTION GUIDE

HEAT PUMP		
PEOPLE	CAPACITY (LITRES)	COLLECTORS (STD CONFIGURATION)
	250	-

Size figures are based on environmental averages which can affect the performance of the solar water heater. Adult icon can represent a dishwasher or washing machine but NOT a spa bath. Based on connection to continuous tariff.

SOLAR - ELECTRIC BOOSTED		
PEOPLE	CAPACITY (LITRES)	COLLECTORS (STD CONFIGURATION)
	250	2
	315	2
	400	3

Size figures are based on environmental averages which can affect the performance of the solar water heater. Adult icon can represent a dishwasher or washing machine but NOT a spa bath.

SOLAR - PRE BOOST GAS		
PEOPLE	CAPACITY (LITRES)	COLLECTORS (STD CONFIGURATION)
	170 (NG ONLY)	2

Size figures are based on environmental averages which can affect the performance of the solar water heater. Adult icon can represent a dishwasher or washing machine but NOT a spa bath. For houses with spas or spa baths, it is recommended you select a larger tank size or seek advice from the manufacturer.

SOLAR - GAS BOOSTED CONTINUOUS		
PEOPLE	CAPACITY (LITRES)	COLLECTORS (STD CONFIGURATION)
	250	2
	315	2
	400	3

Size figures are based on environmental averages which can affect the performance of the solar water heater. Adult icon can represent a dishwasher or washing machine but NOT a spa bath.

5 STAR GAS STORAGE	
PEOPLE	CAPACITY (LITRES)
	135
	170

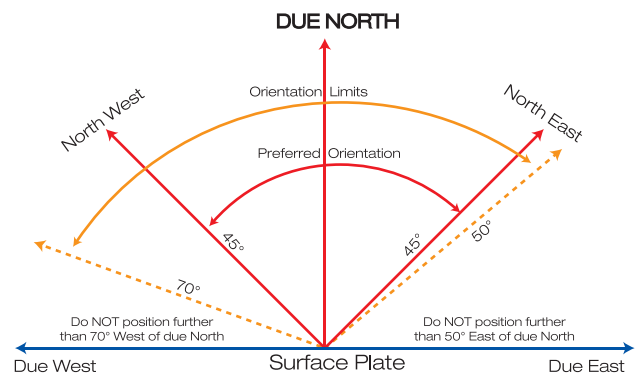

Adult icon can represent a dishwasher or washing machine but NOT a spa bath. Recommended if usage pattern requires multiple showers at the same time.

5 STAR CONTINUOUS FLOW	
PEOPLE	CAPACITY (LITRES)
	16
	20
	26

Adult icon can represent a dishwasher or washing machine but NOT a spa bath.

- For homes with Natural Gas connected, a Gas Boosted Solar System is by far the most efficient system to select.
- Electric Boosted Solar Systems are great for homes not connected to Natural Gas, but still with access to North facing roof which can make use of the sun's energy, providing you with a very efficient means of heating water.
- Heat Pumps come into their own when an old electric hot water heater needs replacing and it is not cost effective to install solar panels on the roof.
- Heat pumps will need to be installed externally, and preferable in a sunny location.
- 5 Star gas product would be recommended on homes connected to Natural Gas, where the installation of a solar or heat pump unit isn't possible or practical.

SOLAR COLLECTOR COMPASS

*These are general recommendations which may not be optimum for all areas. You should consult the manufacturer before purchasing your system.
